EJS, jQuery, AJAX, SQL,  
NVIVO Data Software,  
ArcGIS

Fluent in English, French  
Intermediate in German, JavaScript,  
and TypeScript

## PROFESSIONAL PROFILE

---

I am a lucky horseshoe for startups. I have helped scale 2 startups from small and non-existent markets to highly competitive and profitable organizations. My past bosses will all agree that it is not luck that sets me apart from the group, but my hard work, attention to detail, and willingness to tackle any task, no matter how impossible. I believe that any problem can be solved if broken down to its smallest component and I live by that in everything I do from management to development.

## RECENT & RELEVANT EXPERIENCE

---

### SOFTWARE ENGINEER | NEO FINANCIAL

April 2018 - June 2018

I joined Neo when the company was only about 20 employees in total, as the first female hired at the time. I built the core code base in the early days, and from there worked on everything from database management to front end clients and even data and infrastructure. I helped launch Neo's first 3 products and develop company culture across the board. I created and implemented a technical training program for new hires that was critical in onboarding software engineers of all levels and helped grow the department from under 30 to over 80 employees in less than 6 months.

### GENERAL MANAGER, WEB DEV MENTOR | LIGHTHOUSE LABS

January 2019 - August 2019/ August 2020 - Current

As Lighthouse Labs' first full-time employee in Calgary, I was tasked with setting up the company for success in Alberta. During my time there, I created long-lasting and meaningful relationships within the tech community, curated events to spread tech literacy throughout the city, and carved out a place for Lighthouse to succeed after my departure. I saw 5 cohorts graduate the Web Development Bootcamp and I maintained one of the highest employment rates for any bootcamp across the country. My superb interpersonal skills allowed me to directly train and mentor students in and graduating the program to set them up for a successful career in tech and eventually led me to pursue my own technical role. I currently mentor the same program that I graduated from in 2018 and hold one of the highest ratings of any instructor across the country.

### SPECIAL ASSISTANT | PREMIER'S OFFICE, GOV'T OF ONTARIO

April 2016 - June 2018

I was initially hired to cover a maternity leave, but by the end of my contract the Premier personally requested that I stay on staff as a result of my meticulous work and attention to detail. I worked beside the then Premier of Ontario, Kathleen Wynne, to manage her professional and personal schedule. In this role I juggled my responsibilities as a representative of the government and worked with staff and stakeholders to ensure that every minute of the Premier's day ran as smoothly as possible. I produced planning documents for up to a year in advance and was able to react efficiently and prioritize when major events took place to ensure that the Premier was always reacting in an appropriate timeframe and manner.
