PROFESSIONAL OVERVIEW

I am a lucky horseshoe for startups. I have helped scale two startups from small and non-existent markets to highly competitive and profitable organizations. My past employers will all agree that it is not luck that sets me apart, but my hard work, attention to detail, and willingness to tackle any task. I believe that any problem can be solved if broken down to its smallest component and I live by that in everything I do from management to development.

WORK EXPERIENCE

Intermediate Fullstack Developer

Checkfront, Victoria, BC (Remote) | January 2022 - Present

Currently I am working as a fullstack developer with Checkfront to deliver asset and event booking software. In recent months I have launched two successful projects into production, greatly improved the quality of documentation across the company, and created a series of side projects to enhance developer experience with overall benefits to our end customers. I regularly participate in guild meetings and contribute to projects beyond the realm of my team.

Freelance Developer

Self Employed | July 2021 - January 2022

I have worked on a range of projects from back to front end and fullstack using nodeJS, PHP/WordPress, and Shopify/Liquid. I have worked both independently and as a part of a larger team of other freelance developers and have seen projects from inception to completion or inherited an existing project to help get it to the finish line. I worked closely with project managers under tight deadlines to ensure sound delivery.

Web Dev Instructor/ Mentor / Consultant

Lighthouse Labs, Calgary, AB | August 2020 - Present

I have worked with Lighthouse Labs in various roles since completing the fullstack bootcamp in 2018. Currently, I am working as a consultant for graduates who need coaching in technical interviewing skills. As a bootcamp mentor, I was ranked as one of the top mentors in the country. While working as an instructor, I prepared weekly lectures ranging from coding basics and JS to React and Ruby on Rails.

KAT CONNOLLY

FULLSTACK DEVELOPER, TECH MENTOR, BAH & MPP

EDUCATION

|| Fullstack Web Dev Bootcamp

Lighthouse Labs

2018

|| Masters of Public Policy

University of Calgary

2014-2015

|| Bachelor of Arts (Hons)

Environmental Sustainability

University of King's College

2008 - 2012

WORK EXPERIENCE CONTINUED

Software Engineer

Neo Financial, Calgary, AB | Sept 2019 - July 2021

I joined Neo when the company had only about 20 employees in total, the first female hired at the time. I helped build the core codebase and from there worked on everything from database management to front end clients and event data and infrastructure. I helped launch Neo's first three products and develop company culture across the board. I created and implemented a technical training program for new hires that was critical in onboarding software engineers of all levels. This program grew the department from under 30 to over 80 engineers in less than 6 months.

Community Manager & Career Services

Lighthouse Labs, Calgary, AB | January 2019 - August 2019

I was Lighthouse's first full time employee in Alberta. I was tasked with setting up the company for success in a new market. During my time there, I created long-lasting and meaningful relationships within the tech community, created events to spread tech literacy through the city, and carved out a place for Lighthouse to succeed after my departure. I saw 5 cohorts graduate and maintained one of the highest employment rates of any location of any bootcamp across the country.

Special Assistant

Premier's Office: Government of Ontario, Toronto, AB | April 2016 - June 2018

I worked beside the then Premier of Ontario, Kathleen Wynne, to manage her professional and personal schedule. In this role I juggled my responsibilities as a representative of the government and worked with staff and stakeholders to ensure that every minute of the Premier's day would run as smoothly as possible. I produced planning documents for up to a year in advance and was able to react efficiently and prioritize when major world events took place to ensure that the Premier was always reacting in an appropriate timeframe and manner.

OTHER EXPERIENCE

Tech Mentor and Blogger

I am an active participant in many online communities and provide support and consulting for those who are new to software development. I often take one-on-one meetings but also speak at events with insight and advice for pivoting into the tech industry. I write monthly articles on Medium about tech, pivoting, and navigating remote work in 2022. Some of my more popular posts have views in the thousands.
